Re: Service Training

To: All Addison Representatives

Despite the hurdles of COVID-19 this past year we are excited to announce that our Technical Service Training classes will resume in 2021 with a new line up of product offerings and industry leading innovations!

We have seen a great response to our hands on training – and are honored that we continue to be your preferred educators in the DOAS market.

The three-day training is a perfect opportunity in which technicians will gain knowledge and certification in Addison controls, products, service, and unit operations.

This course will involve lecture, demonstration, informative literature, hands-on experience, and a shop tour.

Payment must accompany the submittal of the registration form. If a cancellation must be made, we ask that you notify of us of this change no later than 48 hours prior to the start of the scheduled class. All payment and registration forms can be submitted to Aqeelah Abdul at aqeelah.abdul@addison-hvac.com. We're very excited about these opportunities and look forward to meeting and training you soon.

If you do not have a service department but can recommend a service company that you think might be interested in this training, please let us know. We would be more than happy to extend this invitation to them.

Our classes will still possess an extensive amount of infield experience and reference material, but our class sizes have changed. In respect to CDC guidelines our class sizes have now been limited to twelve (12) individuals per class. Time and space run out quickly so secure your spot today!

This certification does not count toward continuing education credits.

Sincerely,

Rich Locario
National Service Manager
