

## INTRODUCING THE NEWEST ENHANCEMENTS TO OUR 2019 PR- SERIES!

#AddisonForward2019

To Our Valued Partners:

Addison is continually working to integrate the latest technology into our products, and to standardize componentry across all model sizes and configurations.

To that end, we are pleased to announce the following:

1. Microchannel condenser coils are now standard across all air-cooled models. This includes 6 fan, and 6 oversized fan D & E cabinets. These coils not only offer better performance but are also approximately 600 pounds lighter than the current tube-and-fin coils.

(Please Note: Heat pump models will continue to utilize tube-and-fin coils.)

2. Current 280mm, 355mm, 450mm EC supply and exhaust blowers are being replaced with Ziehl-Abegg 310mm, 350mm, 450mm, 500mm, and 560mm options. These new EC blowers will be offered across the model line (where applicable) shortly.

3. Corrosion protection has been consolidated to three options: coils, cabinets, or all.

4. Disconnect types are now selectable in ACE based on appropriate size calculation.

5. All door hinges will now be full length piano-style on all cabinet configurations.

All orders entered after September 6th, 2019 will be built to the revisions as listed above. However, current quotes and submittals will be honored for up to 30 days.

We continue to work on expanding and enhancing our product lines, and look forward to sharing more exciting news soon!
