

ANNOUNCING NEW CL CABINET CAPABILITIES

In a continuing effort to improve our product offering, we are expanding the CL cabinet capability to include energy recovery and return options. It will be available in the selection program tomorrow Tuesday 03-03-20. Currently the CL cabinet can be selected only as a DOAS without these options.

Consequently, the BXL cabinet will no longer be needed. The CL cabinet will be less expensive and shorter for those selections where the BXL cabinet was needed. Both units will be available in the selection program for 90 days, but on 06-03-2020 the BXL will be phase out. We encourage you to upgrade any selections and submittals using the BXL cabinet to CL cabinet selections for better pricing with similar performance.

The C cabinet will continue to be an option to selections with gas furnace 300MBH and below as the current offering. Eventually this cabinet will be phased out and only the CL configuration will be available for the corresponding capacities.
