

ADDISON

DATA CENTERS

TRANSFORMING DATA CENTERS WITH ADDISON SOLUTIONS

Addison solutions offer significant benefits for data centers. These include:

- Outdoor Packaged DX
- Modular Indoor Air Handler - Vertical or Horizontal (CRAH)
- Indoor Vertical Water-Cooled DX (CRAC)
- Split System DX or Chilled Water (CRAC/CRAH)

Addison products excel in data centers for our unmatched reliability, efficiency and redundancy features. Engineered to maintain precise environmental conditions, Addison products ensure uninterrupted operation of sensitive equipment. Our customizable options make them the ideal choice for safeguarding critical infrastructure. Addison solutions also boast unbeatable 12-week lead times for standard products ensuring prompt deployment and minimal downtime for data center operations.

TRANSFORMING DATA CENTERS WITH ADDISON SOLUTIONS

OUTDOOR PACKAGED DX

- Available in both Air-Source and Water-Source Heat Pump Configurations
- Adaptable for every application requiring dedicated outdoor air, mixed air, and dehumidification
- Supplies conditioned make-up air to replace exhaust air as well as outside air needed for occupants

MODULAR INDOOR AIR HANDLER (CRAH)

- Modular Design
- Adaptable for every application requiring dedicated outdoor air, mixed air, or recirculation
- Available in both Air-Source and Water-Source heat pump applications
- Available with HybridAir Technology

INDOOR VERTICAL WATER-COOLED DX (CRAC)

- Dedicated Outdoor Air or Recirculating Cooling/Dehumidification Operation
- Optional Water-Source Heat Pump Operation
- Compact Design
- Compatible with every application requiring indoor units for ventilation, cooling and/or dehumidification

SPLIT SYSTEM DX OR CHILLED WATER (CRAC/CRAH)

- Dedicated Outdoor Air or Recirculating Cooling/Dehumidification Operation
- Optional Heat Pump Operation
- Modular Design - allows installation in tight spaces
- Ideal for every application requiring split systems for ventilation, cooling and/or dehumidification
- Downflow Air Tower available as a DX split system or a chilled-water AHU
